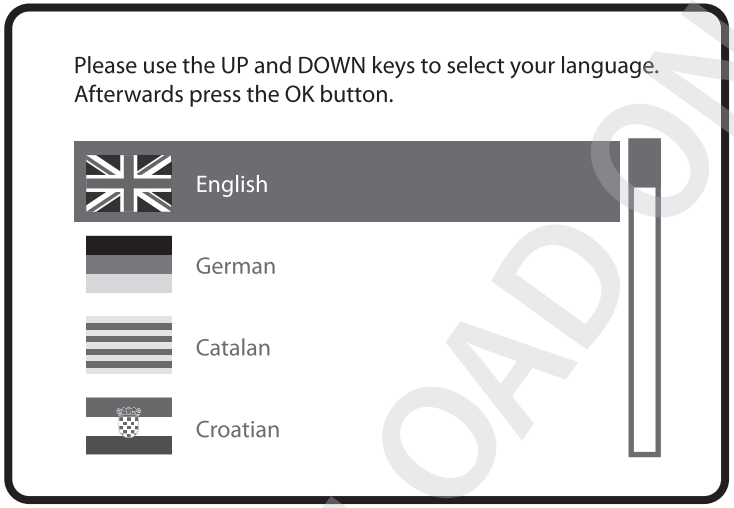
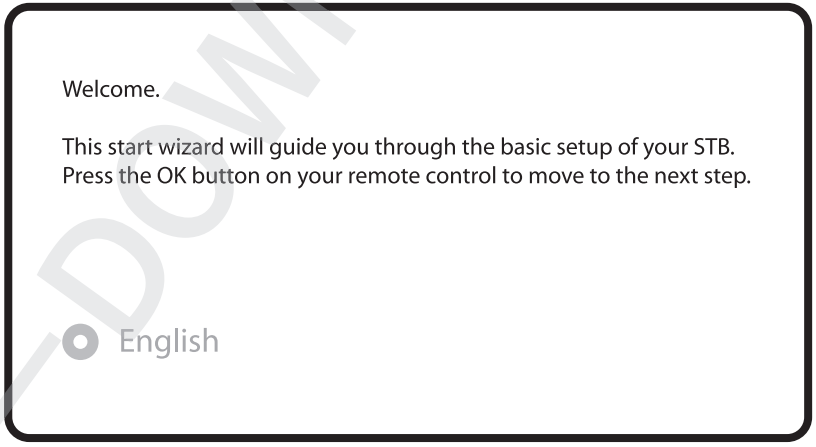
Run First Time Installation

Step 1. Language Selection

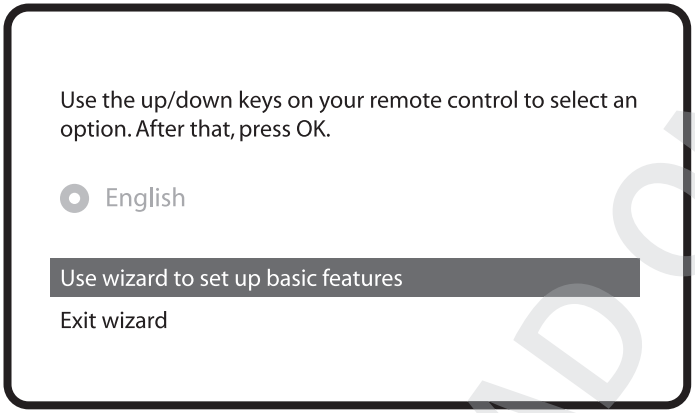


Step 2. Configuring Satellite Connection



DOWNLOAD ONLY

Run First Time Installation



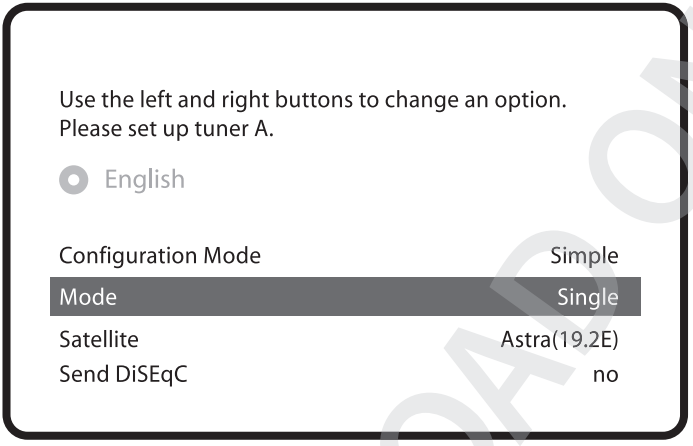
Using LEFT/RIGHT key, you can choose one of the following Configuration Modes:

- Nothing connected
- Simple
- Advanced: for an advanced user configuration.

DOWNLOAD ONLY

Run First Time Installation

If you choose Simple configuration mode, the following picture will appear.



The five modes are available for the satellite cable connection between LNB and your Vu+ as below :

• Single
This option is used to receive a single satellite with a single LNB. The cable from LNB is directly connected to Vu+.

For the other modes, please refer to the user manual of ZERO.

PRECAUTION!!!

This Product has been designed and manufactured in compliance with EU consumer safety requirements (CE). Please read the following safety precautions carefully.

1. Connecting Power
- This product operates only in the range of AC100-240V and 50Hz/60Hz. Please check first your power supply to see if it fits this range.
- Please be noted that you need to disconnect from the mains before you start any maintenance or installation procedures.
- Make sure that the power cord is placed in a position where it is easy to unplug it from the mains in an emergency.

2. Overloading
- Do not overload a wall outlet, extension cord or adapter as this may cause electrical fire or shock.

3. Liquid
- This product is not water-proof and should not be exposed to dripping, splashing, or any type of liquid.
- No objects filled with liquid such as base shall be placed on the product.
- Please do not clean the product with wet cloth, which may cause a short circuit.
- No wet objects should be placed near the product.

4. Ventilation
- Allow a sufficient space between the product and other objects to make sure air ventilation of the product.
- Do not block the top or rear of the product with an object, which will close the ventilation holes and lead to a high temperature of the system. This may cause a failure of the product.
- Do not stack other electronic devices on top of the product.
- Do not insert any kind of pointed objects like screw, gimlet, etc. into the ventilation holes of the product. This will damage the product.

5. Connecting the Satellite Cable.
- Disconnect the power of the product before you connect the satellite cable to the product. Otherwise, it may cause damage to the LNB.

6. Grounding
- The LNB must be earthed to the system earth for the satellite dish.

7. Location
- Place the product indoor.
- Do not expose the product to rain, sun or lightening.
- Do not place the product near any heat appliances as a radiator.
- Ensure that there is more than 10 cm distance from any electrical devices and wall.

8. Lightening, Storm or Not In Use.
- Unplug the product and disconnect the antenna cable during a thunderstorm or lightening, especially when left unattended and unused for a long period of time. This will prevent possible damages from power surges or lightening.

9. Replacement of Parts
- Unauthorized part replacements, especially by one who is not a qualified technician may result in damage to the product.
- Ensure that when part replacements are necessary qualified technicians perform the task using the components specified by the manufacturer.

10. Hard Disk Drive
- Do not move the product or turn the power off suddenly while the Hard Disk Drive (HDD) is still running. This may result in damage to the HDD and thus the system.
- The company shall not be liable for any corruption of data on the HDD caused by careless use or misuse of users.

11. Battery
- There is danger of explosion if batteries are incorrectly replaced.
- Replace batteries only with the same or equivalent type.
